RESUME

CHRISTOPHER MEYER

483 Aqueduct Street
Akron, Ohio 44303
AC 216 864-9176

Instructor in Art - The University of Akron

PERSONAL BACKGROUND

Birthdate:	February 18, 1947
Birthplace:	Richmond, Virginia
Height:	5' 11"
Weight:	150
Marital Status:	Married
Children:	Two

EDUCATIONAL BACKGROUND

1969	B.A. in Art; Washington and Lee University
1972	M.F.A. in Sculpture; Ohio State University

GRANTS

1975	The University of Akron Faculty Research Grant for Design and Construction of Indoor Play Modules.
1974	The University of Akron ERDC Grant for the Design and Construction of a Burn-Out Kiln for Use in the Lost Wax Process.
1972	Ohio State University Fine Art Grant for Casting Research.

COMMISSIONS

Spring, 1976	Design and Construction of Playground for The Akron Jewish Center, Akron, Ohio
Summer, 1975	18' x 130' Wall Mural Commission, Coliseum, Inc., Akron, Ohio
Summer, 1975	Design and Construction of Playground for Hathaway Brown School, Shaker Heights, Ohio
Fall, 1974	Design and Construction of Playground for The University of Akron Day Care Center.
Summer, 1974	Design and Construction of Playground for YMCA Day Care Center, Akron, Ohio
June, 1969	Ceiling Sculpture for Byrd Airport, Richmond, Virginia

EXHIBITIONS

Fall, 1976	Cleveland Museum of Art May Show, Cleveland, Ohio.
Fall, 1976	The University of Akron Faculty Show, Davis Art Gallery, Akron, Ohio.
Fall, 1976	Akron Art Institute, One-Man Show, Akron, Ohio.
Spring, 1976	Ball State National Small Sculpture and Drawing Show, Muncie, Indiana.
Fall, 1975	The University of Akron Faculty Show, Davis Art Gallery, Akron, Ohio.
Spring, 1975	Cleveland Museum of Art May Show, Cleveland, Ohio.
Spring, 1975	Ball State National Sculpture and Drawing Show; Award in Sculpture.
Fall, 1974	The University of Akron Faculty Show, Davis Art Gallery, Akron, Ohio.
Summer, 1974	Massillon Museum Ohio Show, Massillon, Ohio.
Spring, 1974	Butler Art Institute Ohio Show, Youngstown, Ohio.
Winter, 1974	Canton Art Institute Ohio Show, Canton, Ohio.
Spring, 1973	Cleveland Museum of Art May Show, Cleveland, Ohio.
Spring, 1973	The University of Akron Faculty Show, Akron Art Institute, Akron, Ohio.
Summer, 1973	Ohio Expositions, Columbus, Ohio.
Fall, 1973	Cleveland Invitational, Lake Erie College, Painesville, Ohio.
Spring, 1972	Ohio State University Gallery - Two-Man Sculpture Show, Columbus, Ohio.

A Woman for All Arts

CAGAN

Nina F. Gibans is one of those rare people known as an arts administrator.

Executive director of the Cleveland Area Arts Council from its inception on April Fool's Day, 1972, Gibans, in recognition of her toil in the aesthetic vineyards, was recently named Arts Administrator of the Year for 1974 by *Arts Management*, a national arts information newsletter.

She shared the podium with Joseph Papp, founder of the famed New York Shakespeare-in-the-Park Festival, who pulled down the other major award—Career Service—in last year's national arts management sweepstakes.

As Executive Director of CAAC, Gibans has worked to create a central clearing house for artists and the arts community here, helping to set up innovative programs, including the weekly summer Fountain Arts Festival on the Mall; the winter-long "Eine Kleine Noonmusik" series of free Wednesday noon-time concerts in the Arcade; and the City Canvases project, in which the CAAC joined forces with the New Organization for the Visual Arts (NOVA) and the Cleveland chapter of the American Institute of Architects to put murals on downtown walls.

one stained and treated to protect it from rotting and termites. And that friends would admire it and suggest that he try to sell climbers.

Without ever really trying to push the idea ("Construction is so much more pleasant than sales"), he has completed several indoor and outdoor commissions with the help of two students. Among his customers are the nursery school at the University of Akron and Hope Day Care, affiliated with Akron's YMCA. Their Douglas fir climbers cost between five and six hundred dollars, which just covers materials and Meyer's time.

Meyer says he overdesigns for safety's sake, realizing that 20 kids may play on a unit at once. All too aware of the serious accidents caused by collisions with steel swings and tumbles on asphalt, Meyer constructs his climbers from smooth, milled fir, stainless steel (for slides) and unbreakable polypropylene (for tube crawlers). All pieces are bolted and construction-glued and posts are sunk two and a half feet into concrete. For an additional fee, Meyer will finish off the project by landscaping with sand bounded by railroad ties.

With all this concentration on security, he hasn't forgotten the kids. "I like to create climbers that are good for the imagination along with physical development. A swing is a swing and a slide is a slide, but if they're put together in an interesting way they can become something else. . . . Playground design is certainly as much within the realm of art as architecture or a ceramic pot. They're all functional as well as esthetic. Although I'm concerned with how the climbers look, the relationship of the parts—whether a trapeze interferes with a ladder, how kids move from one point to another, whether a slide is too steep—has to be the more important."

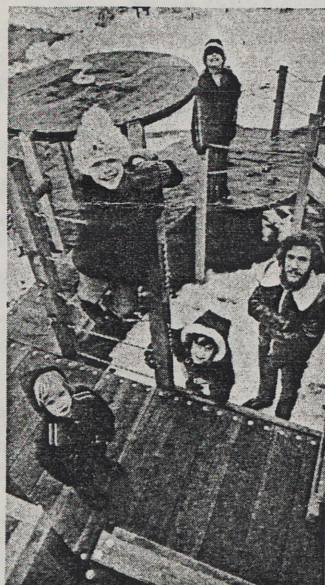

—A.E.J.

Art You Can Climb

Sometime back, Chris Meyer decided he'd had enough of "serious art." The sculpture instructor at the University of Akron says he wanted to make people smile at his work, visually playful creations like cast bronze pigs going to market or staying home and cookie figures and toy airplane propellers attached to brightly painted Masonite sheets.

While growing up, he had pleased his sister by making doll furniture in their father's cabinet shop. And when his own children were born, they happily pounced on Meyer's 15 different toy designs, including wooden trucks and rockers. He always liked to make their gifts instead of buying them.

Then came his idea for an indoor playground, what Meyer calls a "sculpture climber." It's really a wooden environment, with decks, ladders, a small sliding board, swinging

SCHWELIK

Chris Meyer and friends

ropes and a Masonite cube hideout. And it's right there in the middle of the Meyer living room—a functional work of art.

It was inevitable that the sculptor would spend his free time building a larger climber in the back yard,

Chris Meyer's view of Los Angeles in the style of a kid's pull-toy.

Fantasy

Sculpture joins youthful joy with adult sensibilities

By WILLIAM BIERMAN
Beacon Journal Staff Writer

Judging an artist's mental health by the work he produces may or may not be a useful exercise, but Christopher Meyer has got to be one of the happiest and sanest guys in town.

Not only has he stayed genuinely in touch with the world of childhood fantasy—a world from which most people inadvertently divorce themselves, ending up the poorer for it—but he has managed to create a growing collection of sculpture that integrates a sort of joyful innocence with the most sophisticated of adult sensibilities.

Because he uses toys, comic book images and other kid stuff as a point of departure, an exhibit of Meyer's work has the cheerful look of a playroom—and that is the look of the Akron Art Institute gallery where a sampling of Meyer's scul-

ture, produced between 1974 and the present, is on view through Nov. 3.

INCLUDED are large wall pieces in lacquered masonite, smaller free-standing works in natural woods, and a series of—well, to tell the truth, they are bronze castings of dead fetal pigs. You laugh? You're supposed to.

Meyer has a particular affinity for wood, and behind the beguiling fun he generates stands a consummate craftsman who has learned his tools and materials, thought through his premises, and left nothing to chance—except, of course, those subterranean sources of the creative impulse that answer to no schedules.

Meyer's wedding of spoof and discipline is evident in one of the bronze castings, "This Little Pig Cried All The Way Home," in which said pig stands on his haunches and tearfully rubs his eyes. But dig the road home! It's a wonderfully shaped series of diminishing curves, as fluid as a signature, coaxed from laminated chunks of wood and smartly exploiting the exposed grains.

MEYER has what critic Hilton Kramer has called a "humorous approach to form"—even when there is no specific pun or narrative joke involved, there is something essentially comic about the

way he handles shapes. There are funny trees and funny clouds and funny mouths and funny mice heads, all a refreshing deflation of the serious business that life gets to be.

Among the newest pieces are some thoughtful, engaging, purely abstract ventures into the Constructivist tradition, a technology-inspired movement in which linear segments are joined in an architectural sort of way, like the skeleton of an unfinished building. These small pieces don't evoke yuks or yaks, but they indicate another promising direction for the artist.

Meyer is a Virginia native who earned his graduate degree from Ohio State University and teaches on the art faculty at Akron University.

★
Through this Friday, Davis Gallery at Akron U is featuring 25 prints and drawings by New York City artist Agnes Denes, whose work makes reference to scientific and philosophical issues in the history of humanity.

Included in this show are a 17-foot-wide drawing of the evolution of man, and a 21-foot drawing of the development of machines, tools and weapons.

Davis Gallery, on East Exchange Street opposite the Holiday Inn, is open from 6 to 9 p.m. this Wednesday as well as 10 a.m. to 4 p.m. weekdays.

Playground Equipment & Design

DAY CARE

PRIMARY

SECONDARY

ACCESSIBLE TO ALL

**MEYER
DESIGN**

Custom Design

To Our Customers:

Providing children with a safe and creative place to play is the basic premise of our company. Meyer Design has been designing and constructing quality wooden play equipment since 1974, and we are constantly striving to keep the focus on that fundamental purpose...keeping children safe, active and happy.

Creating affordable and innovative playground structures to fill the individual needs of our customers is what we do. We're specialists who appreciate the value and durability of quality craftsmanship, and the importance of personal service.

Our customers work directly with us through all phases of a project, from the initial planning through the installation. All of our structures are tailored to the customer's requirements and to the benefit of the children who use them.

Meyer Design is the only manufacturer of quality play equipment in the state of Ohio. That means we are close enough to all our customers to provide the personal service that is so important to us. Other benefits include reduced costs, lower shipping charges and prompt delivery.

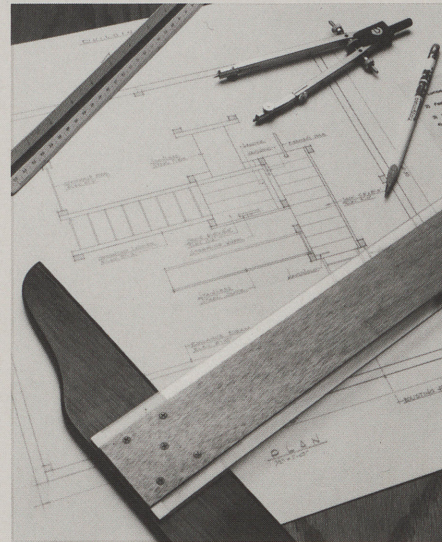

We look forward to working with you. Making our customers happy is vital, and we make that happen by the honest, person-to-person way we do business.

We want each and every playground we design and build to be the best it can be...for you, our customers...and for the children who will enjoy it for many years to come.

Sincerely,

Christopher Meyer

Christopher Meyer
President

Well-designed playground equipment creates a special environment for the children who use it, encouraging their imaginations and physical skills.

Our professional designers can incorporate a great variety of elements into the structures they create, taking into account all the variables of the chosen site. Customer and designer work together to determine the placement, size, cost and possible future expansion of the playground. Other important factors include care of the surrounding environment, drainage, natural features of the site to be included in the play area, and the number and age-groups of the children who will be using the equipment.

After careful study and discussion, we present designs to fit the customer's specific needs and budget. All price quotations include complete design, construction and installation costs.

Quality Materials

Only the finest grade of pressure-treated southern yellow pine is used for construction, and it is guaranteed by the manufacturer for thirty years. Heavy-duty hardware, fasteners and fittings are all plated to prevent rust and corrosion. No nails or screws are ever used, and all bolts used have rounded heads, with nut ends countersunk to eliminate dangerous protrusions.

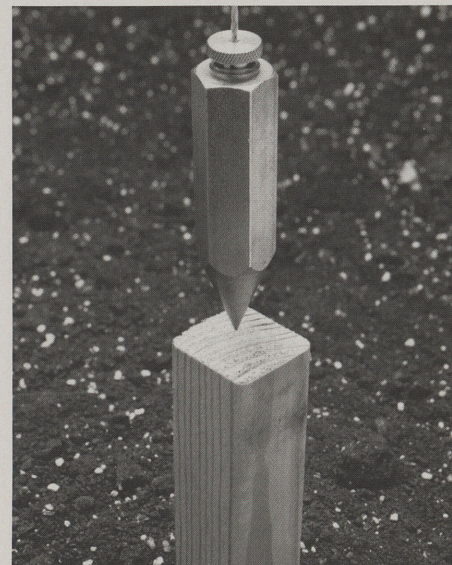

Support posts are sunk at least thirty inches deep in concrete, with drainage gravel beneath.

All wood surfaces are finished with clear sealants or an oil-base stain to provide a safe, durable and attractive surface.

Finally, the play surface beneath the equipment is framed with a timber edge six or twelve inches high, and filled with a six inch deep safety cushion of either washed pea gravel, shredded rubber or shredded hardwood bark with a gravel drainage base. A first quality landscape fabric is used to separate play surfaces from the soil.

Expert Installation

When the design and costs have been approved, our own crew of professionals will install the finished structure to the exact specifications as described above.

Or, if the customer wishes, we can supervise the installation by your own team of volunteer workers. This can reduce total costs by fifteen percent.

Working directly with the customer from start to finish, it is gratifying for us to know we have provided the very finest product available, for a reasonable price.

The end result is a playground in which careful attention has been paid to details, a playground which is ideal for the customer and the surroundings.

Our equipment can be installed with future expansion in mind, and other phases can be added at a later time, over a period of years.

Attn: Mr. Tom Hinson, Curator of Contemporary Art

Dear Tom:

Thank you for your interest in my current activities.

I am enclosing my vitae, and a catalogue which describes my emphasis of the present. The art at making these days is journal oriented and I am not taking slides of it.

Thanks for your letter, maybe I'll shift my emphasis again before long.

Sincerely,

A handwritten signature in cursive script that reads "Chris Meyer". The ink is dark and the signature is fluid.
